

## WEBSITES SCREENSHOTS:

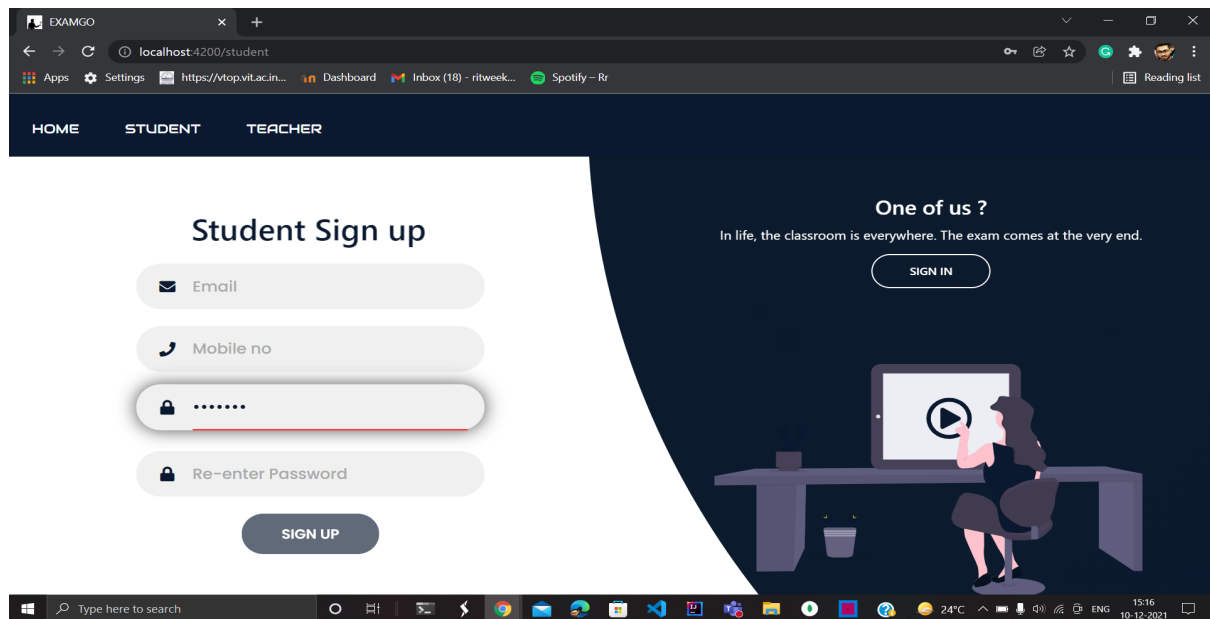

### Student Pages:

1.) This is the student's main page where there is an option for a user to sign up as a student.

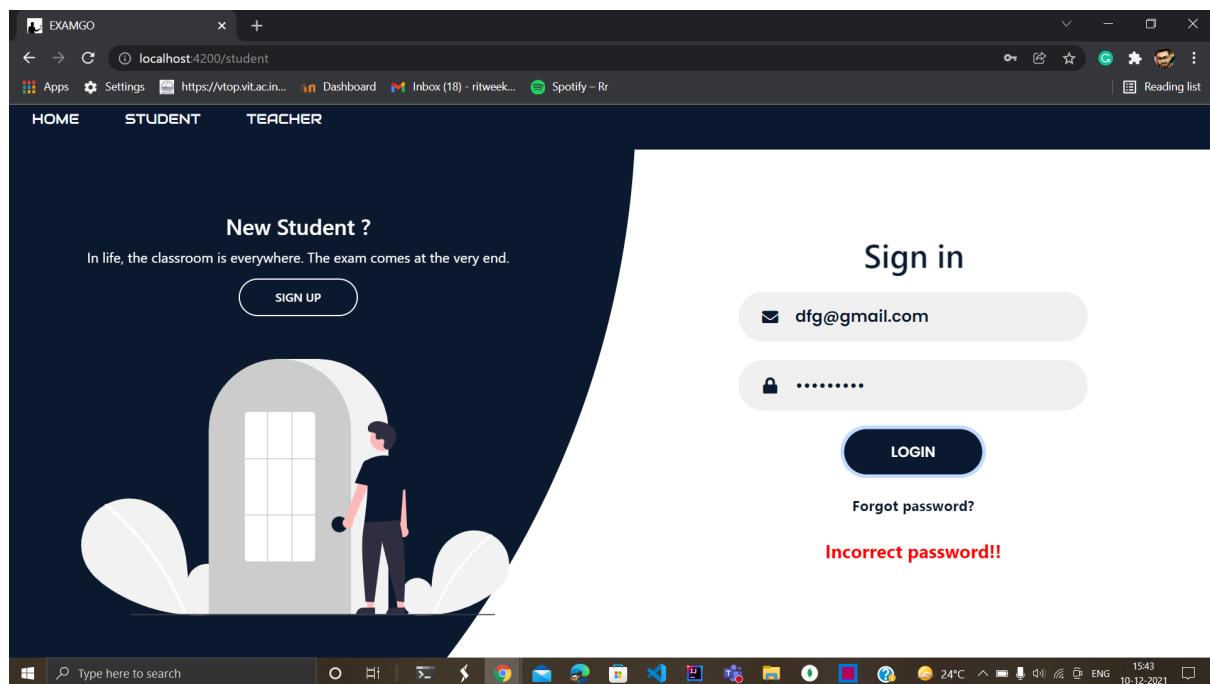

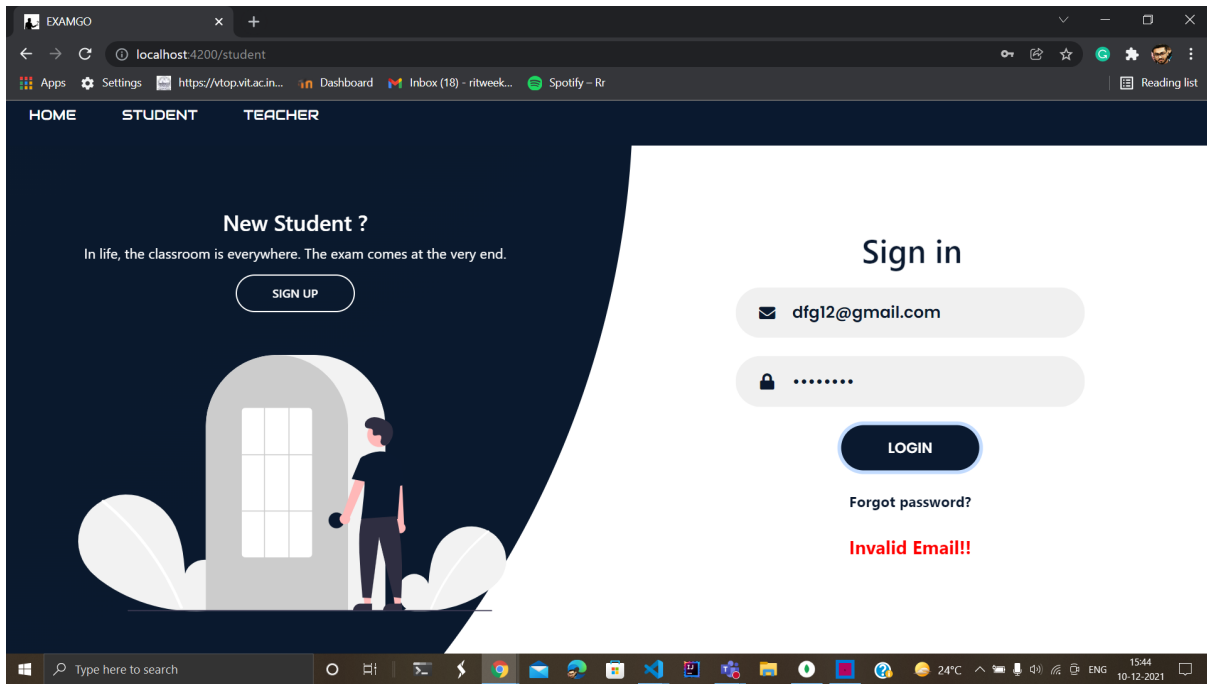

We have implemented basic form validation features over here. Some of them are as follows:

- Phone Number must be at least 10 digits.
- The passwords should have at least one special character, one lower case letter and one upper case letter.
- The Re-enter password must match with the password.
- Email must not be longer than 15 characters.

2.) This is the sign in page which an already existing student can use to sign into the website. Even over here I have added basic form validations.

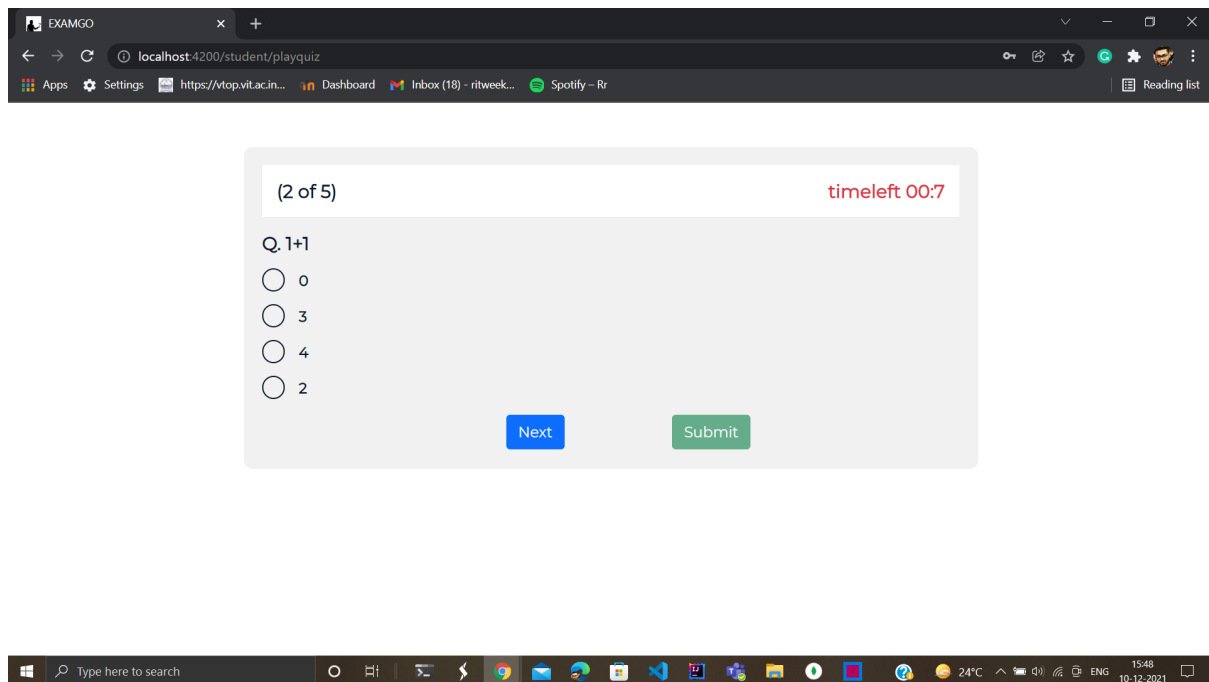

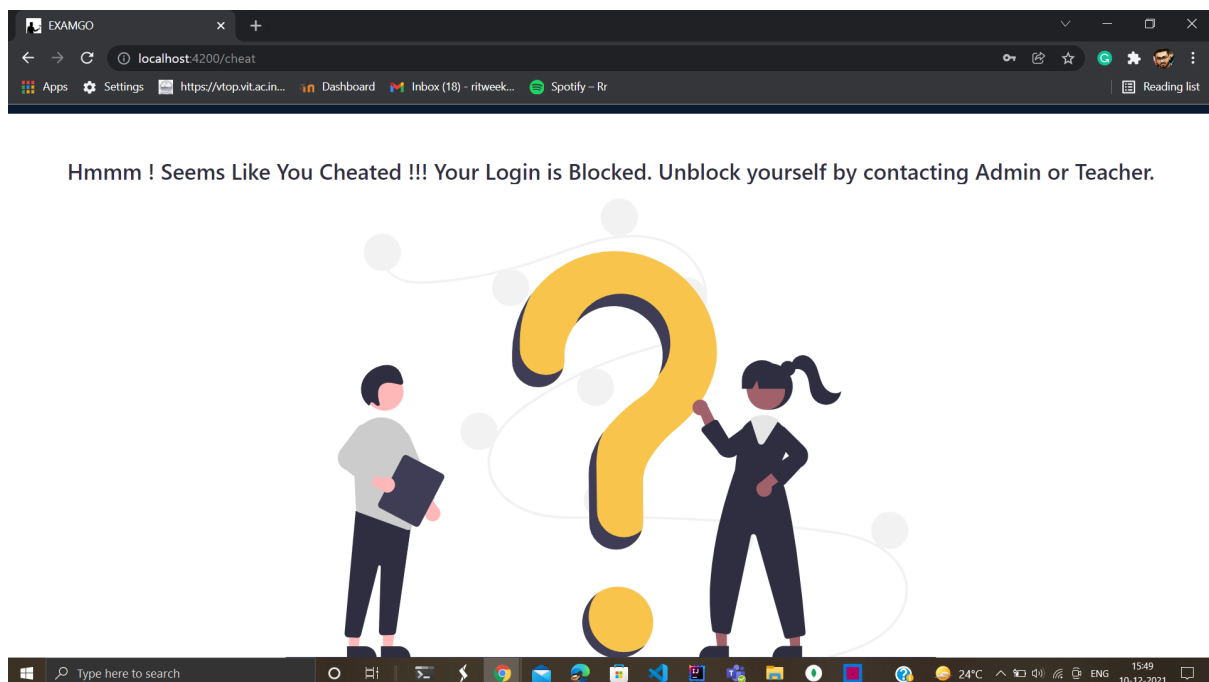

3.) This is the first page the student sees after he signs in. This page contains a quiz table, with all the different quizzes which are available at the moment. The table contains a quiz description and also the creators email id.

#	Quiz Title	Quiz Description	Quiz Creator's Email	View Question
1	QUIZ-1	5 MARKS EACH	lady@gmail.com	Play Quiz
2	QUIZ-2	EACH CARRY 1 MARK	lady@gmail.com	Play Quiz
3	quiz-1	IWP	lady123@gmail.com	Play Quiz
4	QUIZ-2	IWP	lady@gmail.com	Play Quiz
5	QUIZ-2	IWP	lady@gmail.com	Play Quiz

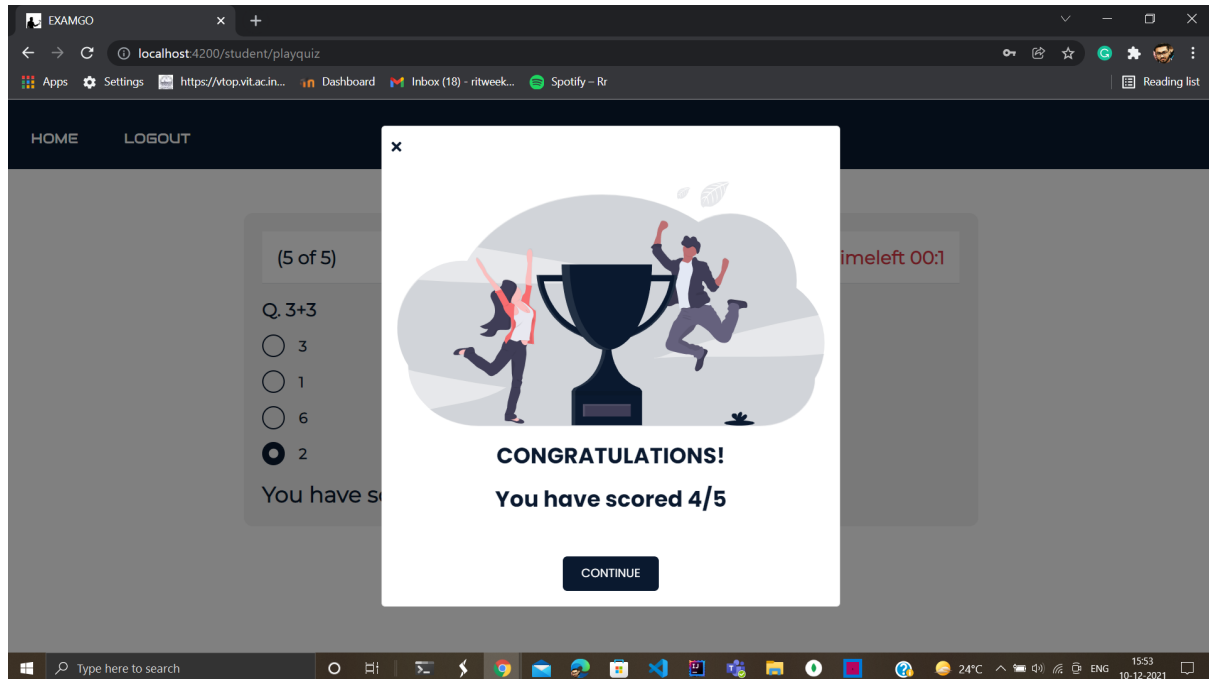

4.) This is how it looks once the quiz starts. Each page contains a single question along with possible answers. There is a timer on top right of the quiz, when time ends, it proceeds to the next question automatically.

5.) To reduce the possibility of malpractice, we have also implemented this feature which blocks the student if he leaves the page, minimizes it or attempts to open another page.

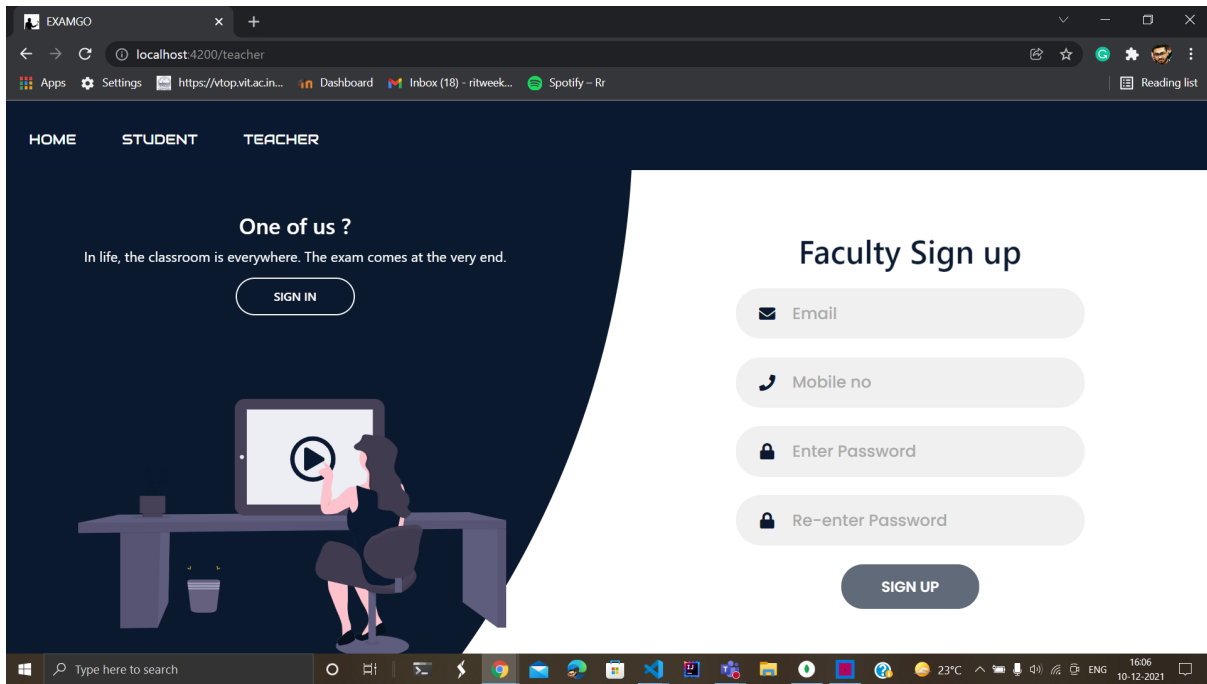

6.) After finishing the quiz the marks will be displayed instantly to the student.

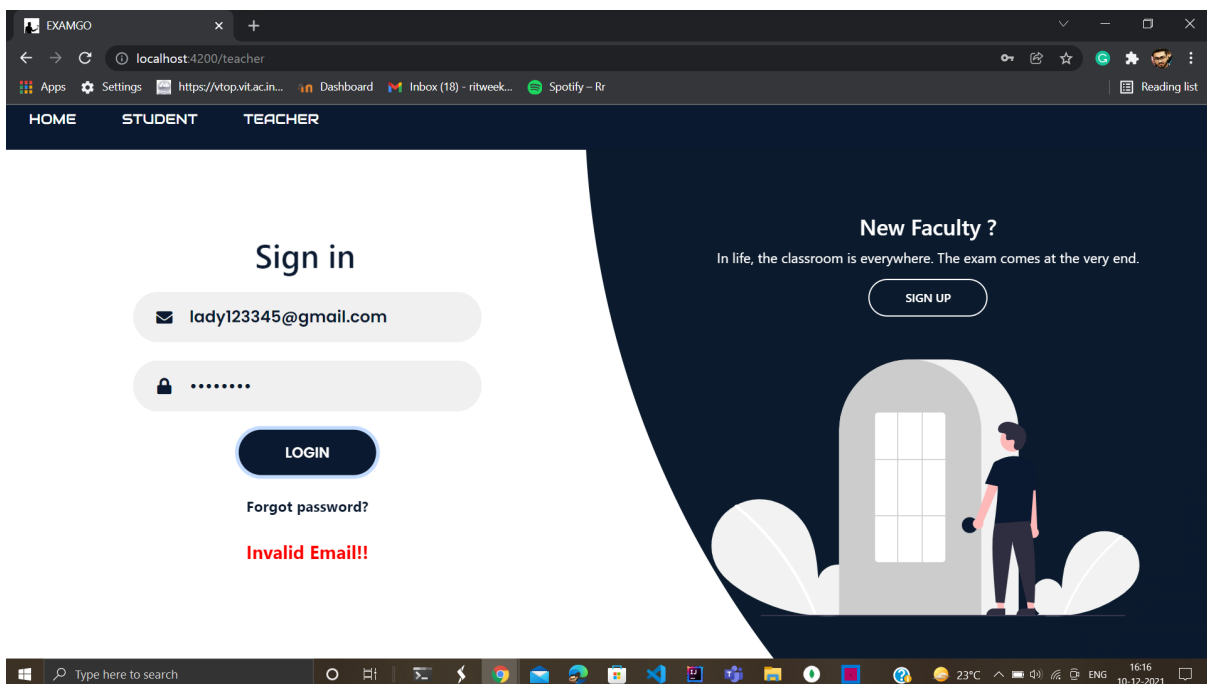

### Teacher Pages:

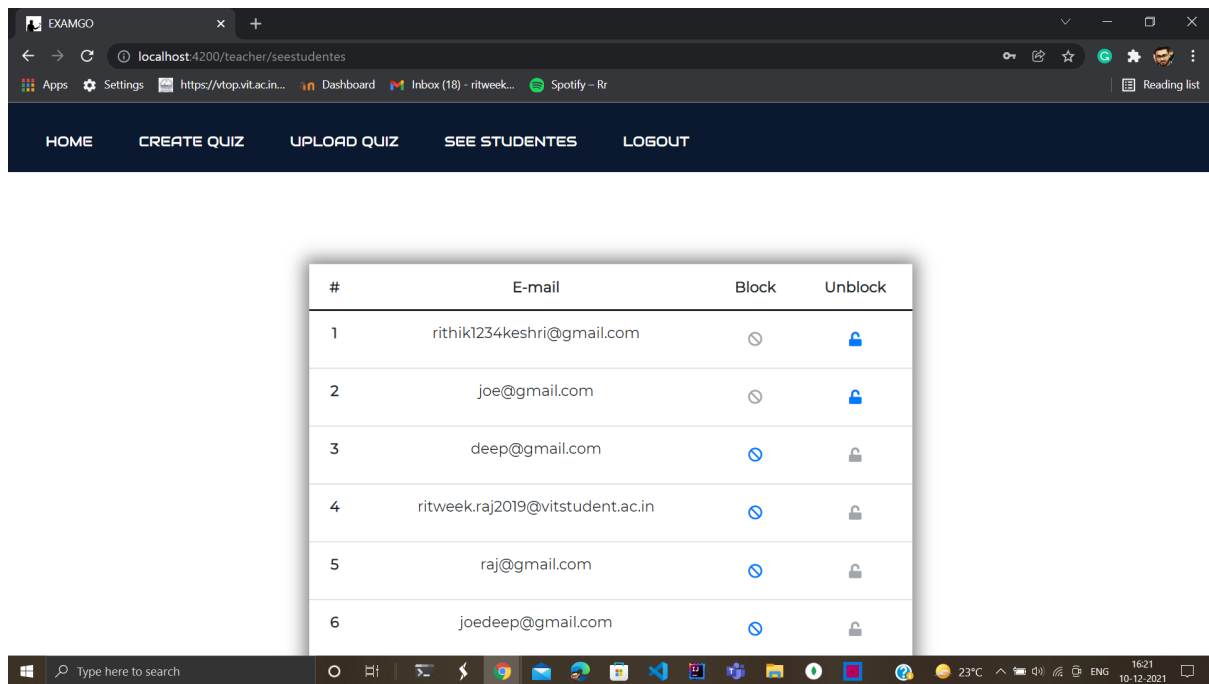

7.) This is the teachers main page which has an option to sign up for newly registered teachers. A similar set of validations are performed in this page as mentioned in the students page.

8.) This is the sign in page, the teacher can use this page to enter the website by filling out the necessary fields correctly.

9.) As mentioned earlier, the student gets blocked in case of any mishap or he tries to cheat, the only way he/she can resume the exam is if the teacher unblocks them.

10.) This is the quiz creation page where the teacher can create new quizzes, they can also add a brief description related to the quiz.

11.) In this page the teacher can add, delete or modify the quiz questions. A minimum of 5 questions are required to upload the quiz.

Quiz #	Name	Description	See Question	Add Question	Upload	Delete
1	Quiz -10	TO CHECK YOUR		<button>Add</button>	<button>Upload</button>	<button>Delete</button>

12.) In this page the teacher can frame the questions to be added in the quiz and also a set of possible answers.
